

MATCH & POKER™

“Not just another new game!”

THE TABLE

The Match and Poker table is a very high quality black jack size table with seven player positions. Each player position is equipped with a high resolution, wide angle 17 cm. TFT screen, a 'hold button' to select a digital card and a betting area for the Match and the Poker bet. The game is operated by a dealer. The dealer controls the electronic part of the game with a 3 button display. The central display shows all the selected digital player cards, the Progressive Jackpot and the Mystery Jackpot. A Pentium 4 computer takes care of the sophisticated software program and generates very high quality game graphics on the TFT screens. In the near future the table will be provided with multiple games to perfectly fit a world-wide player demand.

THE GAME

This interactive game is a combination of a new electronic game and a traditional live card game. The dealer has a real deck of playing cards and each player a digital deck of cards, displayed on their TFT screen. Match & Poker consists of two rounds. To participate in the game, a player has to utilize a digital playing card from a virtual deck. Every player participates automatically in the Progressive and Mystery Jackpot without extra bet or coin in.

FIRST ROUND: Match a card and....catch THE JOKER!

The first part of this game is a very exciting element, which makes it stand out amongst existing casino games. The player places two equal bets; one for the Match and one for the Poker part of the game. The dealer places five cards face down on the table, and activates the card carousel in the players display screens by pushing the dealer's start buttons. After the players have stopped their digital card, the dealer opens the first two cards. If this selected card matches exactly with one of the face up dealer cards (Ten of Spades as shown on the picture), then the Match-bet will immediately be paid out 7:1 where after the player's card will become a Joker (wildcard) for the poker game.

MYSTERY JACKPOT

When a 5 card poker combination has been made by the player's cards, the computer will randomly decide on which of the played boxes the Mystery Jackpot will hit. An animation of lit up buttons and an entertaining tune will announce that there is a Mystery Jackpot hit! The casino can manage the Jackpot-hit frequency as well as the value.

SECOND ROUND: Are you ready? Let's play Poker!

Two dealer cards and one digital card are open and three dealer cards are still face down. The dealer will now ask: Raise or Fold? Now players can make the decision if they will continue in the poker game or fold. If they continue, they must raise the poker-bet (1:1). If any player already has a winning poker hand, a player is not allowed to raise his bet. This player is automatically in the poker game, playing for a better hand.

Matching one of the last three cards will also be paid out 7:1 where after the player's card can be used as a Joker to make a poker combination. Now the dealer will turn the last three cards on the table face up. At this moment there are five dealer cards + one digital player card face up on the table available to make a winning poker hand (Three Pair including a Joker as shown on the picture).

If a player decides to fold, the bank wins the match-bet and the poker-bet returns to the player.

BONUS RANKING

Next to the regular Caribbean Stud Poker ranking, our 6 card Poker combinations will be rewarded with the following high payouts. All can be customized to the requested hold percentage of the casino.

| | |
|------------------------|-------|
| Three Pair | 7:1 |
| 6 card Straight | 15:1 |
| 6 card Flush | 20:1 |
| Three of a Kind Double | 25:1 |
| 6 card Straight Flush | 50:1 |
| 6 card Royal Flush | 250:1 |

NOTE: The digital card always has to be a part of the winning combination.

THE GAME

- It's a Hybrid game;
- Socially Interactive and very entertaining;
- Easy to learn;
- Attractive Payouts;
- One player can play multiple boxes at the same time;
- There is no count ability;
- Free Progressive and Mystery Jackpots;
- Easy Linking Jackpots;
- Longer life cycle (new games in the same table).
